Rules of Conduct

A wounded deer is a harvested deer

Grouse Creek CWMU Description

The Grouse Creek CWMU is located on the Nevada - Utah Border and west of the Grouse Creek Road, southwest of Grouse Creek, Utah. Running from the north to the south is a ridge of mountains starting about 5800 feet in the north, rising up to **6700 feet**, the highest point of the Unit, then decreasing in the south to 5700 feet. There are two major creeks that cut this unit from west to east. There is the Tom Cabin Creek in the ranging from 5800 feet in the west to about **4900 feet** in the east. Similarly, the Dairy Valley Creek in the north ranges from 5900 feet in the west to 5000 feet in the east. The east one-third of the Unit is less mountainous than the western two-thirds.

The Grouse Creek Cooperative Wildlife Management Unit (CWMU) is a combination of three (3) land cover types. To the east is the Inter-Mountain Basins **Big Sagebrush Shrubland** (48). To the west is Great Basin **Pinyon-Juniper Woodland** (37), and in between these two are smaller areas of Great Basin Xeric **Mixed Sagebrush Shrubland** (49).
